

Technical Data Sheet

Toluene TDI grade

Toluene is colourless liquid without sediment.

- Boiling point: 110,6°C

SPECIFICATIONS

Parameter	Unit	Requirements	Method
Toluene content, not less than	wt %	99,9	ASTM D2360
Acid wash color, not more than	-	2	ASTM D848
Benzene content, not more than	mg/kg	300	ASTM D2360
Nonaromatics content, not more than	wt %	0,1	ASTM D2360
Ethylbenzene content, not more than	mg/kg	300	ASTM D2360
Xylenes content, not more than	mg/kg	500	ASTM D2360
Appearance colour PT-Co scale, not more than	-	10	PN-EN ISO 6271

Additional parameters available on customer's request.

APPLICATION AREAS

Toluene is used as a feedstock for a number of chemical syntheses including production of TDA, TDI, DNT, TNT, benzene and xylenes. Toluene is also used as a solvent in paint and lacquer industry and as a fuel's component.

ADDITIONAL INFORMATION

Handling, storage, transport and other detailed safety information available in the specific Material Safety Data Sheet.
